

# Mount Adapter FTZ II

ONE MOUNT.  
ENDLESS INSPIRATION.

The second-generation Mount Adapter FTZ II makes using an F-mount lens together with your Nikon Z camera more comfortable than ever. Whichever F-mount lens you use, there's no loss in image quality, and NIKKOR lenses without Vibration Reduction (VR) will find new levels of sharpness.<sup>1</sup>

## FEATURES

### COMFORTABLE IN ANY ORIENTATION

Ergonomics requested by Nikon pro shooters allow plenty of room to comfortably position your fingers, even when shooting vertically and wearing gloves.

### FULL AF AND AUTO EXPOSURE

Deep. Wide. Close. Sharp. F-mount lenses with a built-in autofocus motor retain full autofocus abilities.<sup>2</sup> Auto exposure shooting is enabled for hundreds of F-mount lenses.

### NEW LEVELS OF SHARPNESS

If you're using an F-mount lens with VR, in-lens yaw-and-pitch detection is supplemented with Nikon Z in-camera roll detection. When you're shooting with a non-VR F-mount lens, yaw, pitch, and roll are corrected in-camera.

### SEAMLESS NIKKOR LOOK

The FTZ II is finished in leather-tone paintwork, smoothly blending the look of your F-mount lens with the adapter. And with your Nikon Z camera.

### TOUGH ENOUGH

A dust- and drip-resistant build incorporates rubber seals for lens and camera connections as well as buttons and levers. The tough, light magnesium-alloy barrel means you're always good to go.

<sup>1</sup> The Mount Adapter FTZ II works with approx. 360 F-mount lenses in total, 90 of which are AF-S, AF-P, or AF-I type and have full AF/AE capability.

<sup>2</sup> Full AF/AE is supported when using FX or DX AF-S Type G/D/E, AF-P type G/E, AF-I type D, and AF-S/AF-I Teleconverters.

## INCLUDED ACCESSORIES

BODY CAP BF-1B

REAR CAP LF-N1
